TERMINAL 4 - PENCIL PITCH CLEAN-UP OPERATIONS

On June 24th, Nic Metrokas, Jim Stutters and I visited the Port of Longview to learn about their pencil pitch cleanup procedures. Their unloading operation differs from ours in that they offload the ship using a small (3 yard) bucket and dump into a portable hopper. The pencil pitch is then transferred to a nearby warehouse by conveyor. Dust from the offloading operation is controlled by keeping a tight seal on the bucket and by providing a "fog" of water above the hopper at the bucket drop point.

In addition, a 40' wide tarp is connected to the bull rail and the ship to prevent the product from entering the river. Trucks are loaded inside the warehouse and the truck boxes are covered with tarps before they leave the facility. The trucks also use a special tape to seal their gates. As a result of these activities, very little product escapes during the operation and the need for major cleanup is minimized.

The cleanup that does occur is limited to the area just outside of the warehouse doors. The area is washed down with fire hoses and directed into a low lying area near a 28"x36" storm drain. The pipe leading from the drain sump is covered with a fabric filter and the four foot deep sump is filled with sand. The washdown water is allowed to slowly perk through the sand and, according to the Port Operations Manager, the water outfall is very clean.

Nic and Jim will be looking at ways to design a fogger system for the Dravo and a sand filter for the storm water sump.

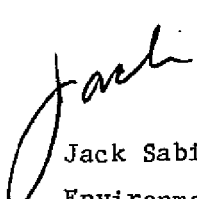

The worker protection practices used by Longview are very similar to our procedures where the workers are subject to the greatest concentrations of pencil pitch dust. Longview insists that those employees use disposable coveralls, sealed boots and gloves, as well as full face respirators. Beards are not allowed for those individuals using respirators because the beards cause the respirators to leak dust to the face.

The area of our greatest employee exposure is inside the Dravo during the dry cleanup and for the stevedores during the outloading operation.

The employee safety equipment used by Longview is available here and the Port should consider a strict policy regarding its proper use. There has been an average of two medical claims by the longshoremen or Port maintenance staff for each shipment of pencil pitch. Risk Management will be issuing an opinion on the worker safety issue by the end of June.

The purchase of the vacuum truck proposed by Marine Maintenance should greatly help to control the worker exposure and environmental impact caused by the pencil pitch. I strongly support its purchase.

We will need to get together soon to work out the design details of the dust control and washdown equipment and procedures. I will schedule a meeting for the week of July 14th. Please let me know if you have any questions.

## INTER-OFFICE COMMUNICATION

TO: Jerry Williams

DATE December 10, 1986

Loren Ballew

FROM Joe Dove

SUBJECT: Monthly Report for November

★ The month of November was the best month that we have had this year. We had one pencil pitch, one talc, two clay and one soda ash ship. We are in a bad need of a new tent for the outloader. We only have two tents left and they are in very bad shape. The vacuum sweeper seems to work very well on the pencil pitch, until it gets wet. It will still pick it up but not as well. The Loci that is in California is still there. Jim Turner is trying to get it loaded on some barges that he bought for Astoria. If he can it will be a lot cheaper to get it up here.

I have informed all of my crew that there will not be any work done on anything that doesn't belong to the Port.

The main jobs that were done in November are as follows:

1. The bumpers for crane #4370
2. New trailer plugs on all maintenance trucks that have hitches.
3. Repaired outriggers on drott #4367.
4. Made ramp for black top roller trailer.
5. Replaced paddles on boom belt main drum on #4364.
6. Repair light plant #4823 for electricians.
7. Make new mounting brackets for air cleaner on terex front end loader #4827.
8. New shaker plates for outloader.
9. Work on hopper and scales on dravo #4357.
10. Clean carter day system on outloader #4364.
11. Replaced winch cable on spout on outloader #4364.
12. Rebuild side shift cylinder on lift #2125.
13. Back up alarm and rewire lights on dump truck #4289.
14. Reworked cross slide on lathe in shop.

There is a way that we can put the tent on the outlaoder that I think will cut the time in half with half the man power. In order to change the way we are now doing it, I have to talk to Myron and see if he will go along with the change.

There should be a list of all employees phone numbers from maintenance, T-4 gearlocker and T-6 gearlocker. The list that we have now is outdated.

Joe Dove  
Terminal Four Equipment Superintendent

## INTER-OFFICE COMMUNICATION

TO: Jerry Williams

DATE November 12, 1986

Loren Ballew

FROM Joe Dove

SUBJECT: Monthly Report For October

For the month of October there were no major breakdowns. We took delivery of the vacuum sweeper from California. It seems to be in good shape. It should be in service within a couple of weeks, at a minimum cost. The trailers from Fort Lewis are here, we maybe able to get them ready to use without spending a lot of money. The work load at Terminal 4 has been very light. The major jobs that were done this month are as follows:

- CHUTE* →
1. Machine #4827 new lift and steering cylinders.
  2. #4239 new king pins, tie rods and drag link.
  3. #4828 new springs on railroad tamper.
  4. 4364 replaced tent and repaired old one on outloader.
  5. #2258 new cam and lifters.
  6. Winterized all equipment.
  7. #4357 new cable on close line on Dravo bucket.
  8. #4357 reworked chute on Dravo for pencil pitch.
  9. #4208 reworked bed for Boilermakers and built new rack.
  10. #4279 remove and replaced pitman and idler arms.
  11. #4288 new sunroof in Painter's van.
  12. #4108 and #4109 new steering axle bushings.
  13. #4276 new brakes and rear seals.
  14. #4367 made new window for the Drott.
  15. Make new bushings and axles for shaker cart.
  16. #4365 new hydraulic lift cylinder for lowboy trailer.
  17. Removed whip lines from all wirley cranes.
  18. #4364 made new boom belt covers from old tents.

We are going to sideline all of the forklifts that are not used by Operations for their everyday operations.

Joe Dove  
Terminal Four  
Equipment Superintendent
